

Perinatal Services BC's Pregnancy & Parent Learning Centre is an online prenatal education platform designed to provide science-backed and trustworthy pregnancy and parenting information to new and soon-to-be parents and caregivers living in British Columbia.

The Learning Centre meets you where you are.

It offers four learning journeys, allowing account holders to learn at their own pace - view lessons in any order, skip what's not needed, and revisit topics anytime.

The Learning Centre was informed by more than 70 perinatal health care providers and educators from across BC, Indigenous leaders, and people with lived experience of pregnancy and early parenting to ensure the content is clinically accurate, current and relatable.

What you need to access the Learning Centre:

A device with an internet connection

An email address for signing up
