IECMHC Certification Requirements

Certification is built on three required components. All three must be completed, and meeting them is necessary but does not by itself guarantee certification, which depends on your engagement and demonstrated readiness throughout.

4-Month Online Program

Eight modules of self-paced coursework, released every two weeks across a 16-week period. You can revisit the content during the four-month program. Access ends once the program is complete.

Weekly Live Practice Sessions

Ninety-minute live sessions each week, where you practice and apply your skills with your instructor and cohort.

8-Month Supervision & Professional Development

After the online program and weekly sessions, you join our supervision community for eight months of reflective supervision and professional development.
